Asset Management

Description

Roles & Responsibilities

Role: BA Asset and Wealth Management

Location- Qatar

Duration: Full Time

Note : Asset Management within the Banking/Investment industry – specifically Capital Markets. However, the profiles shared are largely related to Asset Management infrastructure/networking

Job Description:

- We are seeking a highly skilled Business Analyst / Project Manager with extensive experience in Asset
- and Wealth Management (AWM) to drive key business and technology initiatives. The ideal candidate
- will combine analytical, strategic, and delivery expertise to define requirements, identify process gaps, and
- ensure the successful implementation of solutions aligned with the bank's AWM roadmap and growth

Responsibilities

Lead business requirements gathering, documentation, and validation across AWM functions.

- Identify gaps and improvement opportunities within existing processes and propose actionable
- solutions.
- Manage and oversee end-to-end project delivery, ensuring alignment with strategic priorities and
- timelines.
- Contribute to defining and maintaining the AWM business and technology roadmap.
- Collaborate with product owners, operations, and technology teams to ensure seamless delivery of
- initiatives.
- Apply industry best practices in AWM to optimize workflows and enhance client experience.
