Project Manager – Construction

Description

Roles & Responsibilities

- Define project scope, objectives, and deliverables in collaboration with stakeholders to ensure alignment with business goals.
 - The Project Manager (PM) shall have full responsibility for planning, executing, monitoring, controlling, and closing the hospital construction project. The PM ensures the project is delivered **safely, on time, within budget, and in full compliance** with healthcare design standards, medical engineering requirements, and authority regulations.
 - Responsible for the full construction of the projects
 - Develop and maintain detailed project plans, ensuring alignment with project goals, timelines, and resource allocations.
 - Act as the primary liaison between stakeholders, ensuring clear communication and managing expectations throughout the project lifecycle.
 - Identify potential project risks and implement effective mitigation strategies to minimize impact on deliverables.
 - Lead cross-functional teams by facilitating collaboration and ensuring accountability for project tasks and milestones.
 - Monitor project progress through regular status reports, adjusting plans and resources as necessary to stay on track.
 - Manage project budgets, ensuring efficient allocation of resources and adherence to financial constraints.
 - Conduct regular project meetings to foster team engagement and address any obstacles that may arise.
 - Ensure compliance with industry standards and regulatory requirements throughout the project execution.
 - Evaluate project performance using established metrics, providing insights for continuous improvement in future projects.
 - Document all project phases, decisions, and lessons learned to create a comprehensive knowledge base for future reference.
1. Develop detailed project plans, including timelines and resource allocation, to guide the project team towards successful delivery.
- Lead cross-functional teams by facilitating clear communication and collaboration, ensuring all members understand their roles and responsibilities.
 - Monitor project progress and performance against established milestones, proactively addressing issues to keep the project on track.
 - Good knowledge in building hospitals

Coordinate integration of specialized healthcare systems such as:

- **Medical Gas Systems (MGPS)**
- **Nurse Call Systems**
- **BMS & EMS Systems**
- **HVAC for critical areas (Operation Theatres, ICUs, Isolation Rooms)**
- **Fire Alarm and Life Safety Systems**
